Name: _____ () Class: 3.() Parent's Signature: _____

INSTRUCTIONS TO PUPILS

- 1 Do not turn over the pages until you are told to do so.
- 2 Follow all instructions carefully.
- 3 There are 11 questions in this booklet.
- 4 Answer ALL questions.
- 5 The marks are given in the brackets [] at the end of each question or part question.

Question Paper	Possible Marks	Marks Obtained
Total	30	

This question paper consists of 13 printed pages (inclusive of cover page).

Answer questions 1 to 11. The number of marks available is shown in the brackets [] at the end of each question.

1. The diagram shows some objects grouped according to the materials they are made from and their properties.

- (a) Complete the diagram by using the words in the table.

[2]

Fabric	Clay	Not flexible	Paper
Rubber	Metal	Not waterproof	Scarf

- (b) Circle the object which is most likely to be object R.

[½]

Vase

Nail

Socks

- (c) Which one of the following objects is waterproof? Tick (✓) the correct object.

[½]

- ☐ Silk shirt
- ☐ Plastic hat
- ☐ Cotton handkerchief

SCORE	2
-------	---

3. The picture shows Meimei in a swimming costume in the water with a swimming board.

Which properties are important in the materials used for making the swimming board and the swimming costume?

Write "Yes" or "No" for the following statements.

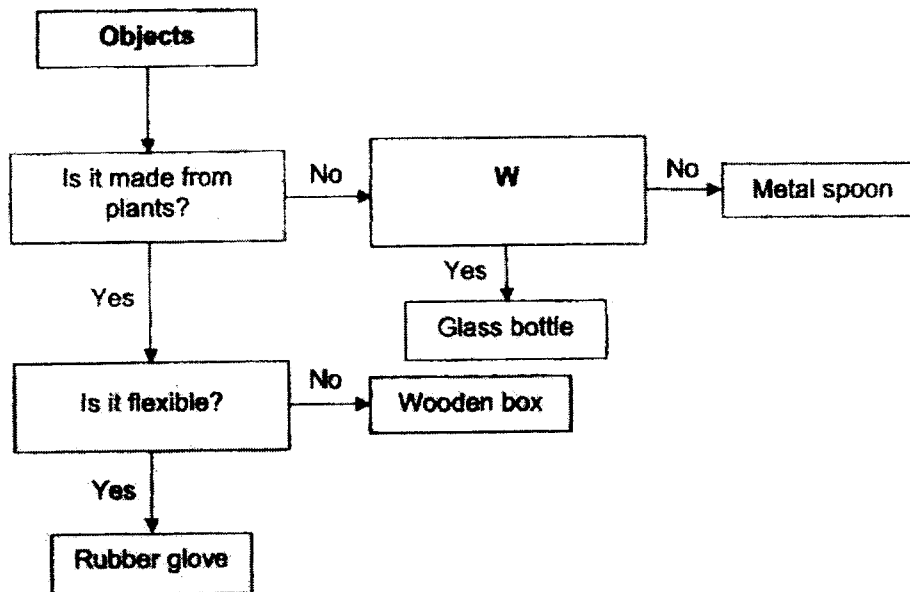

[2]

	Statement	Write "Yes" or "No"
(i)	The material for the swimming costume must be flexible.	
(ii)	The material for the swimming costume must have the ability to float on water.	
(iii)	The material for the swimming board must be transparent.	
(iv)	The material for the swimming board must have the ability to float on water.	

(Go on to the next page)

SCORE	2
-------	---

4. The flowchart shows how four objects are classified.

For parts (a) to (d), answer based on the flowchart.

- (a) State the similarity between the metal spoon and the glass bottle.

[1]

- (b) State the difference between the wooden box and the rubber glove.

[1]

- (c) The letter "W" represents a question that is used to classify the objects. Tick (✓) the question.

[1]

Question	Tick (✓) the question that represents "W"
Is it strong?	
Does it break when dropped?	
Does it come from the ground?	

- (d) Name a material that can be used to make all four objects, spoon, bottle, box and glove.

[1]

SCORE	
	4

5. Draw lines to match each test correctly to the property.

[2]

TEST

PROPERTY

Put weights on it until it breaks.

ABILITY TO FLOAT
ON WATER

Place it in a basin of water.

TRANSPARENCY

Bend it until it breaks.

STRENGTH

Shine a light through it.

FLEXIBILITY

(Go on to the next page)

SCORE	2
-------	---

6. (a) The pictures show six objects. Tick (✓) the objects which are made of only one material. [1]

Coin

☐

Frosted glass jug

☐

Pencil

☐

Spectacles

☐

Tyre

☐

School shoes

☐

- (b) Which object in (a) allows some light to pass through? [1]

- (c) A workman uses a pickaxe to break rocks.

The axe-head is waterproof, sharp and made of very hard material. What is another important property the axe-head must have? [1]

9. Siti potted three similar plants, each in a pot of soil. A different part from each plant had been removed. She watered the plants daily and placed them in the Science laboratory.

- (a) After one week, she observed that one of the plants survived but the other two died. Which plant, A, B or C, is the one that survived? [1]

- (b) Explain why the plant survived. [1]

- (c) Siti moved the plant to the eco-garden and it continued to survive. Explain why. [1]

(Go on to the next page)

SCORE	
	3

10. The diagrams show three plants, A, B and C.

- (a) Based on your observation of the diagrams, which of the following statement(s) about the plants is/are true? Write the letter "T" for true and "F" for false. [2]

	Statement	T or F
(i)	Plant C creeps along the ground.	
(ii)	The pole holds plant A firmly in the soil.	
(iii)	The roots of plant C trap sunlight to make food.	
(iv)	Plant B is different from the other two plants because it has leaves.	

- (b) Observe plants A and C in the diagrams. How are their stems similar? [1]

(Go on to the next page)

SCORE	3
-------	---

11. Tammy carried out an experiment with two similar plants. She placed set-ups X and Y in the classroom for three days.

She observed the water level in the beakers at the end of the three days and recorded the results in a graph.

- (a) Which graph, A, B or C, is correct?

[1]

- (b) State the aim of the experiment.

[1]

- (c) Tammy wanted to conduct another experiment to find out if the number of leaves will affect the amount of water taken in by the plant. Which two changes must she make to set-up X?

[1]

Change 1: _____

Change 2: _____

 TERM : BITE-SIZED ASSESSMENT 3

BOOKLET A

Q1a)	Waterproof: Metal Not waterproof, Fabric, Paper								
Q1b)	Vase								
Q1c)	Plastic hat								
Q2)	Wool, Gold, Gases, Water								
Q3)	i) Yes ii) No iii) No iv) Yes								
Q4a)	They are not made from plants.								
Q4b)	The rubber glove is flexible while the wooden box is not flexible.								
Q4c)	<table border="1"> <thead> <tr> <th>Question</th><th>Tick (✓) the question that represents "W"</th></tr> </thead> <tbody> <tr> <td>Is it strong?</td><td></td></tr> <tr> <td>Does it break when dropped?</td><td>✓</td></tr> <tr> <td>Does it come from the ground?</td><td></td></tr> </tbody> </table>	Question	Tick (✓) the question that represents "W"	Is it strong?		Does it break when dropped?	✓	Does it come from the ground?	
Question	Tick (✓) the question that represents "W"								
Is it strong?									
Does it break when dropped?	✓								
Does it come from the ground?									
Q4d)	Plastic								
Q9a)	Plant A								
Q9b)	It still had both its roots and leaves so it can continue to make food and absorb water.								
Q9c)	The roots and leaves were still intact and the soil had both water and mineral salts. It also got enough sunlight to make food.								
Q10a)	i) T ii) F iii) F iv) F								
Q10b)	Their stems are weak thus they need to either creep along the ground or climb onto something to support itself.								
Q11a)	Graph C								
Q11b)	The aim of the experiment is to find out whether the roots absorb water.								

Q11c)	Change 1: She must remove the plastic bag from the roots. Change 2: She must pluck out all the leaves on set-up X.
-------	---

Q5. Put weights on it until it breaks — strength
 Place it in a basin of water — ability to float on water
 Bend it until it breaks — Flexibility
 Shine a light through it — transparency.

Q6 (a) coin, Frosted glass jug, tyre.
 (b) The frosted glass jug.
 (c) It must be strong.

Q7(a) L
 K
 M
 N

Q7(b) The plant could not release or take in gases as the tiny openings were covered thus it cannot make food.

Q8. (i) Function
 (ii) leaf
 (iii) stem
 (iv) reproduce
