Primary 3 Science  
Term 3 Weighted Assessment 2021

MARKS	
Sect A:	/ 10
Sect B:	/ 10
<b>Total :</b>	<b>/ 20</b>

Name : \_\_\_\_\_ ( )

Class : Primary 3 \_\_\_\_\_

Date : \_\_\_\_\_

Parent's signature: \_\_\_\_\_

Answer all questions.

**Section A: (5 x 2 marks = 10 marks)**

For each question from 1 to 5, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4) and write your answer in the brackets provided.

- 1 The diagram below shows a flowering plant.

Which part, A, B, C or D, does the plant get its food from?

- (1) A
- (2) B
- (3) C
- (4) D

( )

- 2 Plant P has a weak stem and it grows on a pole for support as shown in the picture below.

Which statement below about plant P is true when the pole is removed?

- (1) Plant P will die immediately.
  - (2) Plant P makes less food as it receives less sunlight.
  - (3) Plant P will not be able to absorb water from the ground.
  - (4) Plant P will grow a thicker stem to stand upright on its own. ( )
- 3 Mr Lim went for an operation to remove part of his large intestine due to a disease. Which of the following statements is true after his operation?

- (1) Food will take a longer time to be digested.
- (2) Food will take a longer time to be absorbed.
- (3) Undigested food will become drier and harder.
- (4) Undigested food cannot be turned into solid waste. ( )

- 4 Study the organ system below.

What is the function of the organ system shown above?

- (1) digests food
- (2) gives our body its shape
- (3) transports digested food in our body
- (4) takes in and removes air from our body

(      )

- 5 The picture below shows Kristy riding a bicycle.

As Kristy cycles faster, she starts to breathe faster.  
Which of the following statements is correct?

- (1) Kristy's digestive system stops working when she cycles.
- (2) Kristy's circulatory system stops working when she stops cycling.
- (3) Kristy's respiratory system needs to take in more air when she is cycling faster.
- (4) Only Kristy's skeletal and muscular systems are working together when she cycles.

Score	
	10

**Section B: Structured questions (10 marks)**

For each question from 6 to 8, write your answers in the space provided. The number of marks available is shown in brackets [ ] at the end of each question or part question.

- 6 Study the set-ups shown below. Each beaker is filled with 200 ml of water. The lid covers the top of the beaker.

- (a) Complete the table by writing 'R' and 'S' in the correct boxes.

[1]

Set-up	Amount of water left in the beaker after 4 hours(ml)
<input type="text"/>	160
<input type="text"/>	185
Q	(b) ?

- (b) What is the amount of water left in the beaker of Set-up Q after 4 hours? Write your answer in the box below.

[1]

 ml

- (c) Give a reason for your answer in (b).

7 Study the flowchart below.

(a) Name organs A and B.

[1]

Organ A: \_\_\_\_\_

Organ B: \_\_\_\_\_

(b) State the function of gullet.

[1]

\_\_\_\_\_

(c) Digested food is absorbed into the blood at the \_\_\_\_\_  
and transported around the body by the \_\_\_\_\_ system.

- 8 The diagram below shows the human system Y.

- (a) Organs F, G and H belong to the same organ system Y. The statements below describe how these organs work. Put a tick ( ✓ ) in the correct column to indicate if the statement is true or false. [2]

Statements	True	False
(i) Digestion begins at organ F.		
(ii) Digestion is completed at organ G.		
(ii) Organ H stores remaining digested food.		

- (b) Two similar pieces of biscuit are placed into set-ups P and Q as shown in the diagrams below.

It is observed that the smaller pieces of biscuit in set-up Q was broken down faster than one whole piece of biscuit in set-up P. Explain why. [2]
