50-cent

20-cent

The diagram shows a horizontal row of five rectangular boxes representing coins. The first two boxes are labeled '50-cent' and the last three are labeled '20-cent'. A large right-facing curly bracket on the right side of the row is labeled '30.09 g'. An arrow points from the first box (50-cent) down to the text '10.41 g'. Another arrow points from the first box of the 20-cent group down to a question mark '?'.

10.41 g

?

30.09 g

$$3 \text{ fifty-cent coins} = 30.09 \text{ g} - 10.41 \text{ g} = 19.68 \text{ g}$$

$$19.68 \text{ g} \div 3 = \underline{6.56 \text{ g}}$$
